CUSTOM DESIGN:

As a customer you will receive a Custom Web Page Design. If you have not already, please send samples or links to us to get an idea of what you would like your website to be like. A link includes the HTTP:// (hyper text transfer protocol) Your Custom Design is a Basic design package. You will receive an INDEX page (main page) and up to 4 additional pages. Most basic sites include the following:

HOME | About us | Contact us | Links | Products

As you can see the above sample includes 5 pages, you can substitute page names or customize how you would like your other pages to be organized. For example;

You can change About us to a Services Page where a list of your services can be displayed. Just let us know what you would like and we'll create it for you.

The construction of your website may take a bit longer than you think. Due to high demand of this service and the speed of which the internet propagates your site information it usually takes 15-30 days to **completely** finish your website.

(this time is not a definite time frame it all depends on how quickly you get us the information and how many changes or alterations you make during the design phase. However good sites are never finished which is why you receive an allocated amount of time each month for changes or updates to your site!

SHARED HOSTING:

You are receiving a Shared Hosting plan for your website. A shared hosting plan is Hosting service that allows you to effectively manage your site by sharing server space with other clients allowing for a lower cost of service. A dedicated server or computer is only needed for clients such as bestbuy.com or sears.com where the traffic is so HIGH that they need a computer or server all to themselves.

DOMAIN:

A domain is *An Internet address in alphabetic form. Domain names must have at least 2 parts: the part on the left which names the organization, and the part on the right which identifies the highest sub domain, such as the country (fr for France, uk for United Kingdom) or the type of organization such as .COM*

SEARCH ENGINE OPTIMIZATION:

A form of online marketing, search engine optimization (or search engine marketing) is the process of making a site and its content highly relevant for both search engines and searchers. Successful search marketing helps a site gain top positioning for relevant words and phrases. Be sure you tell me which keywords you would like to focus on. We will recommend a few for you and our site construction process takes advantage of the way search engines look at sites. If you wish to upgrade your search engine optimization to the Advanced Search Engine Optimization there is a one time charge of \$250.00. Our Advanced SEO uses a custom algorithm created by us to get you a higher page rank and not have to pay for top ranking. The downside of this process is that it takes about 30 days to begin to show results.

UPDATES:

For each NO HASSLE WEBSITE!™ plan ie: the \$35, \$75, \$100, \$200, or \$600 a month plan you will receive a set amount of time per month for updates or changes. The time allotment is as follows:
